Re: WT Docket 11-65

Dear Chairman Genachowski,

Access to the latest and most up-to-the-minute technologies is important for any business to compete in the global market. Dependable, wireless service is paramount in an area such as ours, home to Fort Hood, the largest active-duty armored post in the country.

For this reason, the Greater Killeen Chamber of Commerce supports the proposed merger between AT&T and T-Mobile. We respectfully request that you approve this merger.

While much has been said regarding the merger, there is no doubt that access to increased coverage areas, faster internet speeds and broadband connections to smaller cities, such as ours, are critical to competing in a world where new technologies are introduced daily. You know that the U. S. lags in broadband deployment. It is often the case that this is at the expense of mid-sized communities such as ours.

The AT&T/T-Mobile merger is an opportunity to bring new possibilities to the way we live, work and do business. We thank you for your support of this merger.

Sincerely

John Crutchfield
President/CEO
